

Care & Repair

Care & Repair is all about helping people who are vulnerable because of age, disability or other risk factors, to continue living comfortably and safely in their own homes.

We work with both home owners and people in rented accommodation to help them find the best solution to unsuitable housing conditions. This could be help to adapt or repair properties once problems have become apparent, or it could be help with preventative measures to reduce risks and plan for future housing needs. If you ask us about a service we can't provide ourselves, we can direct you to other support services and organisations.

We have Care & Repair agencies in Central and West Cornwall, Devon and Plymouth. The scope of the service in each area varies according to local circumstances.

Please click on your local agency to find out what services are available and for local contact details.
